CROSS-CONNECTION AND BACKFLOW CONTROL QUESTIONNAIRE

Cross-Connection control, also referred to as backflow prevention, protects the public water system from pollution and cross-contamination. It is the responsibility of the water purveyor as well as the Owner/Developer to prevent cross-contamination. Owner/Developer involvement and cooperation is vital to the success of the program required by TCEQ, the EPA and the Texas Safe Water Drinking Act.

To protect the public water supply from cross-connections, Bluff Dale Water Supply under the regulations of the TCEQ; require an approved backflow prevention assembly to be installed directly behind the water meter if an actual or potential cross-connection exists. This questionnaire will assist Bluff Dale Water in assessing whether a backflow prevention assembly will be required on the property.

The completed questionnaire will become part of BDWSC's customer records as required in BDWSC's procedure for new or existing service. BDWSC may also request a questionnaire to be completed at a later date to confirm that no changes have been made to the plumbing system on the property.

To obtain information required for installation and testing of an approved backflow prevention assembly, please contact BDWSC's licensed operator at 254-592-3150 or the office at 254-592-5619. You may also see the list on BDWSC's website at www.bluffdalewater.com.

Thank you for your help and cooperation with this vitally important issue.

Applicant Information

(Please print)

Customer/Applicant Name: _____

Parcel#: _____

Service Address: _____

Phone#: _____

Customer Account Number: _____

Please answer all questions on reverse and sign questionnaire.

Important: answer all questions accurately and sign questionnaire.

1. Is there a well or another water supply on the property? Yes | No
2. If YES above, will the system be connected to the same water system as the potable water meter? Yes | No
3. Do you currently or in the future plan to use fertilizer or chemical injection system? Yes | No

Customer Questionnaire for Lead and Copper Testing of Drinking Water

The Bluff Dale Water Supply Corporation Water System is required to do Lead and Copper testing at least every three years at different locations within our distribution system. In order to compile a database of the materials used in our customer's service lines and plumbing required by our sampling plan, please take a few minutes to complete this questionnaire and return to:

Please fill out form completely. Please drop off at drop slot at 169 Glen St. at the white picket fence in the mailbox with the combination lock or mail to Bluff Dale Water Supply
PO Box 232
Bluff Dale, Texas 76433
For Questions please feel free to call or text Deborah Morris at 254-592-5619 or email the office at bdws2013@gmail.com..

We thank you for your cooperation in helping us with this to continue to serve clean and safe drinking water to our customers.

Contact Information

Name of Person filling out this questionnaire: _____

Phone Number should we have questions: _____

Property Information

Address (use separate sheet for each property): _____

Type: Single Family Multi-Family Commercial Industrial

Year Built: Before 1982 After 1982

Materials List

1. What material is your service line (3) made of? (Check all that apply)
 Lead Copper Galvanized steel P.E. (polyethylene) Unknown
2. When was the service line going into your house or business installed?
 Before 1982 After 1982
3. What material are the pipes in your house or business made of? (Check all that apply)
