

# TCEQ Approved Licensed BPAT Inspectors

A BPAT inspection is required annually for RV Parks, Stores or Restaurants with Drink Fountains, Garages or Auto Service Businesses, Animal Clinics or Medical Clinics that do surgery, Schools, Businesses that use any type of chemicals, grease or similar products, Churches, Baptismal Services or drinking fountains, sprinkler systems and Hair Salons. Any business or residential building that could possibly create a hazard to the Bluff Dale Water System due to Cross Connection or Backflow. You must have a backflow preventor installed on your side of the meter to prevent a hazard from occurring. This is the customer's responsibility to have a TCEQ Approved licensed inspector come and determine if a backflow preventor is required. If a backflow device is installed this must be inspected every year and a copy of the inspection report given to the Bluff Dale Water Supply. The Customer will be responsible for the inspection cost. For more information on Backflow requirements visit the link: <https://www.tceq.texas.gov/drinkingwater/cross-connection>
